Hiring Team
Appdiv Systems Development
Addis Ababa, Ethiopia

Dear Hiring Team at Appdiv Systems Development,

I am writing to apply for the Software Engineer position at Appdiv. I recently graduated with a B.Sc. in Software Engineering from Arba Minch University (2026), backed by 3 years of remote software engineering and technical project management experience at Charles Schwab and international clients since 2020.

I am a versatile, fast-learning engineer proficient in TypeScript, React, Node.js, Python, and SQL, with a proven ability to master any new stack or framework rapidly. Having worked in remote enterprise environments, my primary goal upon graduation is to join an active on-site team in Addis Ababa. I am excited to collaborate with Appdiv's engineers in person, adapt quickly to your development workflows, and build high-quality digital solutions for clients.

I speak English, Amharic, Afaan Oromoo, and basic French. I welcome the chance to discuss how I can contribute to Appdiv.

Sincerely,
Mikiyas Sahilu
