Payment details may be communicated separately through the Client Portal or the Parties' agreed communication channels.

6. NATURE OF THE RETAINER

The monthly retainer represents the reservation of the Service Provider's professional creative, production, management, and strategic capacity for Ersas Interiors during each monthly service period.

The retainer covers the professional operation described throughout this Agreement, including strategy, research, ideation, creative direction, content production, editing, publishing, platform management, analytics, reporting, and optimization.

The retainer does not constitute unlimited production or unlimited working hours.

The quantitative production commitments established in this Agreement and its schedules define the expected monthly production range.

Where a requested project materially exceeds the agreed scope, the Parties may separately agree on additional production, resources, fees, or timelines.

---

7. SOCIAL MEDIA PLATFORMS

The Service Provider shall manage, monitor, and support the Client's presence on the following primary platforms:

1. **Instagram**
2. **TikTok**
3. **Facebook**

These platforms constitute the primary social media channels covered by the monthly retainer.

Additional platforms, including YouTube, LinkedIn, or other platforms, may be incorporated if mutually agreed by the Parties and if the additional requirements can reasonably be accommodated within the engagement.

---

8. MONTHLY VIDEO CONTENT PRODUCTION

The Service Provider shall produce and manage a minimum of **18 video content pieces per month for each primary platform**, with the monthly production

target capable of increasing to a maximum of **25 video content pieces per platform** depending on the monthly content plan, available projects, production opportunities, and strategic requirements.

Accordingly, the monthly platform-specific video publishing scope is:

Platform	Minimum	Maximum
Instagram	18 videos/month	25 videos/month
TikTok	18 videos/month	25 videos/month
Facebook	18 videos/month	25 videos/month

This establishes a minimum of **54 platform-published video instances per month** across the three primary platforms and a maximum of **75 platform-published video instances per month**.

The Parties acknowledge that one professionally produced content concept may be adapted for multiple platforms where appropriate. Platform adaptation may involve changes to duration, framing, captions, hooks, covers, descriptions, formatting, editing, or presentation.

The purpose of the platform-specific quantity is therefore to establish the expected publishing volume and operational responsibility rather than require the unnecessary production of three completely unrelated videos whenever one concept can appropriately serve multiple platforms.
